ADVERTISERS.

In consequence of the alteration of the hour of going to Press, consequent on the large increase in the circulation, it is imperative that all Copy for Advertisements should be received BY FIRST POST THURSDAY MORNING at the latest.

cultivation are grown extensively in separate large breadths, and are now in full fruit. All those interested in their various characteristics are cordially invited to come and partake, and make minute examination. Well rooted runners will shortly be ready. For particulars, send for a Catalogue. H. CANNELL & SONS, Swanley, Kent.

The Best Present for a Gardener.

VINES AND VINE CULTURE. The most complete and exhaustive Treatise on Grapes and their Culture ever published. Third Edition just out.

Price 5s.; post free, 5s. 6d. A. F. BARRON, Boyal Horticultural Society, Chiswick.

DOUQUET WIRE .- Silver-plated Wire, and Galvanized Wire in Rings, 5s. 6d. per stone 14 lb. Blue or White Annealed Wire in Rings, any gauge, 2s. per stone 14 lb. Carriage paid.

JOHN W. WOODHEAD, Wire Manufacturer, 8, Elland Road, Brighouse.

Sow in June. WALL-FLOWER .- Our strain of Single Wallflower is unsurpassed for variety of colour, size of the spikes of bloom, and robust free-dowering habit. G. R. Garthorne, Esq. West Dulwich, says, ". Your Wallflowers are rightly named ' Superb." never saw anything more beautiful." Price of seed, mixed colours, Ir. 6d. per packet, post free.

SUTTON'S SEEDS GENUINE ONLY DIRECT FROM CUTTON AND SONS, THE SEEDSMEN, READING.

MARCISSUS .- Grand Monarque Narciss, and the large-flowering Jonquil, Campernelli, exceptionally fine home-grown Bulbs, at very low prices. T. GELL, Week Farm, Ventnor, Isle of Wight.

DOUVARDIAS. - Best Market varieties; Vreelandii, Mrs. R. Green, P. Cleveland, &c., our selsotion in eight or ten sorts, 2s, 6d, per doz., 12s, per 100; 25 per 1000. Well-rooted stuff fit for 60's. Cash with Order. CRANE AND CLARKE, The Nurseries, March, Cambs.

PLANTS, 2s. 6d. per 1000; Myatt's Offenham, 2s. 6d.; Drumbead SAVOY, 2s. 6d.; Covent Garden BRUSSEL, 2s. 6d.; Veitch's Autumn Giant CAULIFLOWER, 4s.; Early London, 4s.

W. HORNE, CHiffe, Bochester, Kent.

DALMS, CORYPHAS and LATANIAS from Stores, 10s, per 100. Cash or exchange for Carnations, Dahlias, or Bedding Geraniums.

F. ROSS & CO., Merstham, Surrey.

plants, in 67's, 20s. per 100. Strong-rooted Outtings, 10s, per 100. Cash with order. D. ANDERSON, Teddington Nursery, S.W.

Important to Mushroom Growers. TUTHBERT'S SPECIALITE MUSHROOM

SPAWN. Always alike; most productive. Hundreds of testimonials. Per bushel, br. R. AND G. CUTHERRY, Seed, Bulb, and Plant Merchants. Southgate, N. Established 1797.

CUPERB ORCHIDS, CHEAP.-Thousands to select from. Write for LIST, free. P. McARTHUR, The London Nursery, 4, Maida Vale, London, W.

Petroleum | Petroleum ! | Petroleum ! ! ! In casks, carriage paid, 84d, per gallon.

ANDREW POTTER, Melbourne Works, Wolverhampton. Maker to the Queen and Prince of Wales.

NIOW is the TIME to PLANT PYRETH-RUMS, GAILLARDIAS, DELPHINIUMS, and CANNAS. Catalogue of KELWAY AND SON, Langport, Somerset.

Autumn Giant, strong and well-rooted, about 100,000, 3s. per 1000, on rail .- R. H. BATH, Osborne Farm, Wiebech.

healthy CATTLEYAS, LELIAS, &c.; good plants and varieties at about a third of dealer's prices. Lists. MR. STAMPER, Ulverston.

Peaches, Nectarines, Melons, Strawberries, &c. JOHN NATHAN, Jun., Long Market, Covent Garden, W.C., is open to receive Consignments of above. Best price guaranteed; 5 % Commission. Bankers references.

AANTED, about 2000 strong TOMATO PLANTS. Send prices and sort for cash, to G. W., 8, St George's Road, Norland Road, Notting Hill, W.

A/ANTED.—Ten PALMS of sorts from 5 to 9 feet high; also must be well furnished and perfectly healthy plants. Offers and full description to-D. STEWART & SONS, Fern Down Numeries, Wimborne.

VEGETABLES, FRUIT, and FLOWERS, by a Private Buyer, until end of July .- Address, KENSINGTON, care of Mr. Stent, 15, Gledhow Terrace, South Kensington.

... of FERNS, PALMS, CARNATIONS, ROSES, &c., is now ready, and will be sent post-free on application. Dyson's Lane Nurseries, Upper Edmonton.

CPECIAL OFFER - 1000 H. JACOBY GERANIUMS, in 48-pots. Cheep to clear, D. ANDERSON, Teddington Nursery, S.W.

26th year of Distribution.

Williams' Superb Strain, Is, 64, per dozen; IOs, per 100. CINEBARIAS, same price; also DOUBLE WHITE PRIM-ULAS, 6d, each. Package and Carriage free for Cash with Order, -JOHN STEVENS, The Nurseries, Coventry.

LENRY RIDES, SALESMAN, Central Avenue, Covent Garden, W.C. Highest Market Prices. Prompt cash.

DEGONIAS, Double and Single, for Bedding. Extra superb in quality. Selected large tubers. Also for Conservatory and Exhibition. Descriptive CATALOGUE free. B. R. DAVIS, Yeovil Nurseries, Somerset.

MADAME JULES CHRETIEN.

The most distinct and beautiful continental variety yet in commerce. Centre of flower white, encircled with intense violet-blue, edged with very bright red. Dwarf compact habit, and very free. Excellent for winter blooming. Strong plants, 1s, each, 10s, per dozen.

WILLIAM POTTEN, Camden Nurseries, Cranbrook, Kent.

LIUMEA ELEGANS.—Strong healthy plants. Price on application. B. S. WILLIAMS AND SON, Victoria and Paradise Nurseries. Upper Holloway, London, N.

description at every Reasonable Prices, and efficient men to cultivate them. apply to-

W. L. LEWIS AND CO., Southgate, London, N. PRICE LIST free.

L'ERNS AND DECORATIVE PLANTS !-(TRADE) :- Ferns, in 24-inch pots, Stove and Greenhouse, 30 best selling sorts, 13s. 100; ditto large, in 48's, 10 best selling sorts, 6s. doz.; strong seedlings, 6s. 100, 50s. 1000; Adiantum cuneatum, in 48's, for cutting, 6s, and 8s, doz. ; ditto, for making large plants quickly, 16s, and 20s, 100; Aralias, 10s. 100 : Cyperus, Aralias, Grevilleas, Geraniums, in 48's, 6s. doz. : Heliotrope, Fuchsias, Double Petunias, Marguerites, Genistas, in bloom, in 48's, 9s, doz.; Ficus, Palms, Dracomas, Ericas, Hydrangeas, Pelargoniums, 12s. doz. Lists free. Packed free. Cash with order, -J. SMITH, London Fern Surseries, Loughborough Junction, London, S.W.

Crushed Bones and all High-class Fertilisers,

Genuine only from-W. H. BEESON, Carbrook Bone Mills, Sheffield,

GISHURST COMPOUND, used since 1859 for Red Spider, Mildew, Thrips, Greenfly, and other blight; 2 ounces to the gallon of soft water; 4 to 16 ounces as a winter dressing for Vines and Orchard-house trees, in lather from cake, for American blight, and as an emulsion when paraffin is used. Has outlived many preparations intended to supersede it. Boxes, 1s., 3s., and 10s. 6d.

O ISHURSTINE keeps Boots dry and soft on wet ground. Boxes, 6d, and 1s., from the Trade. Wholesale from PRICE'S PATENT CANDLE COMPANY (Limited), London.

By Special Appointment TO H.R.H. THE PRINCE OF WALES,

MACKENZIE AND MONCUR, Limited, HOTHOUSE BUILDERS & HEATING ENGINEERS, Edinburgh, London, and Glasgow. Plans and Estimates for all kinds of Horticultural Buildings, Pavilions, Summer Houses, and Heating Apparatus free. Splendid Illustrated Catalogue. LONDON OFFICE: -50, CAMDEN ROAD, N.W.

WEEKS & CO., Horticultural Builders . to Her Majesty, H.R.H. the Prince of Wales, H.M. Government, Admiralty Dept., War Dept., Royal Hort. Soc., Royal Botanic Soc., Parks and Public Buildings, Patentees of the Duplex Upright Tubular Boilers, King's Road, Chelses, S. W.

delicately tinted flowers of various shades. In a shelter the many plants of Edelweiss carry their woolly white heads erect, and in several parts of the gardens are large patches of Narcissus poeticus and its double white variety, the former being Mr. Broome's favourite Narcissus, and the latter one of the most useful for cutting. Along the borders is a fine display of coloured Polyanthus and Auriculas, whose flowers, however, are now on the wane; and occupying long stretches of edging, are broad rows of seedling Aubrietias, raised at Sunny Hill, and which have unusually large flowers varying in hue from pale mauve to dark purple, and so profusely bloomed as to nearly cover the leaves. Roses are cultivated in profusion, and notwithstanding that the severe winter cut some of the tenderest back, they have already recovered, and are well set with flowers. The sunk garden, partly walled in and partly enclosed by ornamental and flowering shrubs, is a delightful nook, in which the rarer alpine plants, the North American Cypripedium spectabile, C. calceolus, and other terrestrial Orchids are blooming satisfactorily. On the rockery on one side, the different varieties of alpine Phloxes, the Arenarias, Androsaces, Saxifrages, Sempervivums, and plants of that class, are making a beautiful display; while in the beds and borders beneath the climber-clad walls, the Aquilegias, Doronicums, Pyrethrums, Rosa rugosa and its white variety, and other showy kinds of herbaceous perennials and flowering shrubs are masses of richly-coloured and fragrant flowers. Among the flowering shrubs, Magnolia Halleana, and other of the small-growing Magnolias proved hardier than many of the commoner shrubs and bushes. M. Halleana has been in flower for months pant. At the end of the smooth green lawn an ornamental summer-house appears, the borders on each side being filled with Pansies, Roses, Azalea mollis, and other showy flowers; here, too, are fine bushes of the blue Marguerite (Agathæa cœlestis), and a quantity of Anemones, which are very beautiful in spring but are now past blooming.

THE ORCHIDS

still occupy the old houses, though a nice block specially constructed to accommodate them by Messrs. Richardson is approaching completion.

The collection is chiefly noted for its fine varieties of Cattleyas, Lælias, Dendrobiums, &c., and each section gives a good show at the present time. Facing the entrance of the Cattleya-house is a fine group composed of varieties of C. Mossiæ, of which C. M. majestica and C. M. Prince of Orange are two grand forms. At the back is a specimen of C. Mendeli with over thirty large blooms, and beside it the handsome and distinct C. Mendeli rubicunda, with eight flowers, wholly tinted of a bright light rose, the lip being ruby-red. At one end is a fine form of Lælia purpurata with thirteen flowers, and at the other several lighter forms of the same species, and with them are Sobralia macrantha, Cattleya Aclandiæ, Dendrobium suavissimum, with eight large spikes; Lælia Boothiana, a large specimen of Oncidium sphacelatum, Vanda teres, &c. The next house is a warm and moist one, in which some Nepenthes are suspended. Here the Cypripediums thrive remarkably well, a noble specimen of C. caudatum roseum having produced a large number of flowers. The Cypripediums of the C. niveum class are also well represented, a number of fine C. bellatulum, C. niveum, and C. Godefroyæ being in bloom. Dendrobium thyrsiflorum and other Dendrobes, too, are fine, the D. Wardianum making marvellous growths. Vanda coerulea does well at Sunny Hill, and Coelogyne cristata alba evidently likes its accommodation, and keeps more plump than is usually the case. A fine Lælia tenebrosa is in flower, and L. crispa superba and others showing well for bloom.

Rex showing well for bloom; some healthy specimens of the Pescatorea section of Zygopetalum unusually fresh-looking and vigorous. Mr. Snill, the Orchid-grower at Sunny Hill, keeps these always moist, and in a shady corner of the house where there is an even temperature, and the result is most satisfactory.

The cool-house has a good number of fine Odon-toglossums, brilliant Masdevallias, Oncidiums, &c., and in the greenhouses are a show of greenhouse Rhododendrons, Lilium Brownii, L. Wallichii, and other Lilies; charming plants of Schizanthus retusus and S. Grahami, covered with flowers, and which are grown to perfection here, &c.

In the drawing-room, Mrs. Broome has some cleverly-arranged vases of cut Orchids, in which the fine golden sprays of Oncidium ampliatum majus, strong spikes of Cypripedium philippinense, pendent sprays of Odontoglossum citrosmum, and massive Cattleyas, are effectively used, and by their beauty give at least one good reason for growing Orchids. Visitor.

ORCHID NOTES AND GLEANINGS.

ONCIDIUM CONCOLOR SUPERBUM.

Oncidium concolor is in flower in the collection of Dr. Jessop, Roundhay Mount, Leeds (gardener, Mr. T. Tyson). The vigour of the plant and large size of its pseudobulbs seemed to promise flowers of extraordinary size, and these have not belied the promise. Its bright-coloured flowers are more than 2 inches across transversely, and the fine labellum 1½ inch wide, the bright orange edges of the crest and wings of the column adding much to its attractiveness. The inflorescence bore ten flowers. Like all of the Oncidiums from the Organ Mountains, it succeeds in a house which is maintained at a tolerably cool temperature. J. O'B.

CYPRIPEDIUM BELLATULUM ALBUM.

A most beautiful albino of Cypripedium bellatulum is now flowering in the collection of Sir Frederick Wigan, Clare Lawn, East Sheen, to which the above appropriate name has been given. The flower is of spotless white, with a little yellow on the centre of the staminode, and quite typical in size and shape. Further, the entire plant has lost all the purple markings, the underside of the leaves, as well as the scape, ovary, and bract being entirely green, and thus the albinism extends throughout the entire plant. It was discovered by Mr. R. Moore, Assistant Superintendent of the Shan States, the gentleman to whom we are indebted for the discovery of the beautiful Cypripedium Charlesworthii. Several plants are in existence, and were distributed by Messrs. Charlesworth & Co., to whom they were sent by Mr. Moore. It is a strikingly distinct form, and undoubtedly a great acquisition. R. A. R. [Shown at the Royal Horticultural Society on Tuesday last.

CYPRIPEDIUM CHARLESWORTHII

was discovered by Mr. R. Moore at a place some 25 miles south-west of Lake Inle, high up on a limestone hill fully 5000 feet above sea-level; and very recently it has been gathered in quite an opposite direction 40 miles north-east of the lake, or some 60 miles from the place in which it was originally found. It appears to make its home on hills of a certain formation only... "I have been out with Shans, and on arriving at a particular place, they, by looking at the hill, will tell you whether C. Charlesworthii will be found there or not. If it occurs at all, it will be in large quantities, and not a plant will be found on neighbouring hills of different shape or formation... The roots cling to the rocks with extraordinary tenacity." Orchid Review.

ONCIDIUM HÆMATOCHEILUM.

This is a native of Trinidad, and, according to Mr. Potter, writing in the June number of the Orchid Review, it is a hybrid between O. luridum and O. Lanceanum. Mr. Potter gives various evidence in support of his conclusion.

ROUND BORDEAUX.

M. TREYERAN has, at his country house, a charming winter-garden attached to the billiard-room, and there many and splendid tree Ferns form the greatest ornaments. It leads into the great Cattleya-house, where are sturdy plants of C. Mossiæ, Warneri, and

Lawrenceana, in excellent health, as are also two very large plants of Cymbidium Lowi, well bloomed; the finest example that I know of Sobralia macrantha, very large plants of Cypripedium, &c. The paths here, as in all the other houses, are edged with a rockwork planted with Ferns, foliage Begonias, and similar plants. The whole effect is very pleasing. One house contains Philodendron pinnatifidum, of rare beauty and remarkable vigour, very large Palms, large plants of Cycas revoluta, &c.

Two other houses are specially devoted to Cattleya, of which plants M. Treyeran collects the best varieties and species. There are here Cattleya Claesiana, unusually well-grown examples of C. Mossiæ, very large clumps of Lælia purpurata, Cattleya Mossiæ, with flowers of unusual size; C. Trianæi, an elegant variety of C. Schroderæ, a very fine C. Skinneri alba, and other varieties. The Odontoglossum-house is well constructed, and here the plants grow well, although the climate of Bordeaux is not favourable to them. We noted a fine O. Ruckeri, an O. excellens with large perfectly formed flowers, fine wide petals, pure white in the centre, decidedly the most beautiful variety known. A fine Odontoglossum Coradinei was found near an Oncidium cucullatum giganteum of an unusually dark shade. Pollen grains of the maritime Pine are found in quantities 40 kilomètres (25 miles) away from the borders of the Gulf of Gascony, in the water that fills the tanks of the Odontoglossum-house. In the hot-house a fine plant of Selenipedium Schroderi was noticeable for its splendid colouring, many examples of Cypripedium Chamberlainianum bloomed continuously, some fine plants of Cattleya Schilleriana were seen, beside some new plants, among which was a Bromeliad with leaves of a very deep red colour.

Besides these houses, there are others devoted to the cultivation of Azaleas, Gloxinias, &c. All are well kept, and attest the high degree of horticultural skill possessed by the proprietor, M. D. Treyeran, one of the most energetic of Bordelais horticulturists.

M. MARTIN CAHUZAC'S PLANTS. - M. Martin Cahuzac, the President of the Société Horticole and Viticole of La Gironde at Bordeaux, has a summer residence on the heights which surround the town, and whence he enjoys a magnificent prospect. The flower-garden which surrounds the houses abounds with Roses and Carnations; there is also a very fine collection of Cannas, with large flowers. The Odontoglossumhouse deserves praise. In spite of the unfavourable climate of Bordeaux, the plants are in excellent condition; perforated pipes allow of the flow, from the end of May until September, of an abundance of water which ensures the maintenance of the necessary coolness and moisture. Thanks to this ingenious plan, O. crispum, Pescatorei, Rossi, Ruckeri, citrosmum, Cochlioda, as well as Cattleya Mendeli, Schilleriana, and Mossiæ, here grow and bloom excellently. In the fine Cattleya-house a splendid C. Mossiæ alba attracts attention, as well as great numbers of Cypripedium; a fine Cypripedium Rothschildianum is there, near an Eulophiella Elisabethæ, In another house we noticed a splendid Phalænopais Luddemanniana, and particularly a charming variety of Lælia elegans marginata, with the petals bordered with purple; also an interesting collection o. Vanda. There is here an unrivalled Pritchardia macrocarps, and a beautiful variety of Areca sapida called argentea.

M. VIDEAUD has conservatories in the outer part of Bordeaux. One house contains very large specimens of Cattleya—one, C. Mossiæ, with six bulbs and fourteen spathes. A very large irregular rockwork allows the continuous passage of water, drop by drop. It is stocked with various plants, and has a charming effect. Mexican Orchids here grow to an unusual size; Lycaste, cultivated in baskets, form very large bulbs. We noted here some good varieties of Cattleya Mossiæ and some unusually fise Lælia anceps.

A second house is devoted to Oncidium with very large clusters of roots and bulbs; O. hastilsbium with unusually fine bulbs, Cattleya Mossie with
