Advertisers are specially requested to note, that, under no circumstances whatever, can any particular position be guaranteed for advertisements occupying less space than an entire column.

Now ready, in cloth, 11s. 6d.  
**THE GARDENERS' CHRONICLE,**  
Vol. VII., Third Series, JAN. to JUNE, 1890.  
W. RICHARDS, 41, Wellington Street, Strand, W.C.

**THE GARDENERS' CHRONICLE**  
IN AMERICA.

The Subscription to America, including Postage, in \$4.30 for Twelve Months.

Agent for America:—E. H. LIBBY, Manager, "The American Garden," 10, Spruce Street, New York, to whom American Orders may be sent.

**SALTERHEBBLE and DISTRICT (Halifax)**  
ROSE SHOW, THURSDAY, July 24. Schedules on application to  
JNO. E. BROOKS, Secretary.  
4, Savile Park Street, Halifax.

**WILMSLOW and ALDERLEY**  
HORTICULTURAL SOCIETY.—The above Society will hold its SECOND ANNUAL SHOW in Hawthorn Hall Field, Wilmslow, on FRIDAY and SATURDAY, July 25 and 26 next. Schedule of Prizes (£140) on application.  
T. W. MARKLAND, { Hon. Secs.  
C. E. H. HOBSON, }

**ROYAL AQUARIUM, Westminster.**  
GREAT SUMMER SHOW, JULY 29 and 30.  
CARNATIONS, PICOTEES, BEGONIAS, &c. Miscellaneous Exhibits specially invited, for which a number of Cash Prizes and Medals are reserved. Schedules and all details from  
WILLIAM HOLMES,  
Frampton Park Nurseries, Hackney, London, N.E.

**THE ROYAL HORTICULTURAL**  
SOCIETY OF SOUTHAMPTON.  
TWENTY-EIGHTH ANNUAL GREAT SUMMER SHOW.  
AUGUST 2 and 4. TWO HUNDRED and FIFTY POUNDS IN PRIZES. Entries close July 28.  
Heckfield Ho., New Alma Road. C. S. FUIDGE, Sec.

**EREWASH VALLEY FLOWER SHOW,**  
Codnor Park.  
FORTY-SIXTH EXHIBITION, AUGUST 9. TEN POUNDS SPECIAL PRIZES for ROSES (open).  
High Holborn, Codnor, viâ Derby. J. LANGLOW, Sec.

For Present Sowing.  
**SUTTON'S IMPROVED QUEEN ONION.**—  
The earliest of all Onions. Sown in July or August it is fit for use during the Autumn. Very mild and delicate in flavour. Price of seed 1s. 6d. per packet, post-free.

**SUTTON'S LIST OF VEGETABLE AND FLOWER SEEDS** for Summer and Autumn sowing, post-free on application.  
**SUTTON'S SEEDS** Genuine only Direct from SUTTON AND SONS, The Queen's Seedsmen, Reading. No agents.

**Dutch Bulbs.**  
**CHARLES SHARPE and CO.'S Wholesale** CATALOGUE of Dutch and other Flower Roots, is now ready. It has been Posted to their Customers, and will be sent post-free to any address on application.  
Before ordering, write for List and compare prices.  
Seed Warehouse, Sleaford.—July, 1890.

**Paul & Son's Roses.**  
**THE ROSES** are finely in flower and growth. Magnificent FRUIT TREES, and all ORNAMENTAL TREES, in good condition to select from, at  
PAUL AND SON'S, The "Old" Nurseries, Cheshunt, Great Eastern Railway.

**BULBS FOR AUTUMN-FLOWERING.**—  
Summer Planting LIST, now ready, of rare Crocus species, for autumn and spring-flowering, beautiful and rare Colchicums, Sternbergia (Lily of the Field), Zephyranthes (Flowers of the West Wind), Pyrethrums for autumn planting, &c. LIST free on application.  
BARR AND SON, 12 and 13, King Street, Covent Garden, W.C.

**JOHN JAMES, 7, Flower Market, Covent** Garden, W.C., receives on Commission, GRAPES, TOMATOS, and other choice FRUITS and FLOWERS. Reference: London and County Bank. Highest Market Prices. Account Sales daily. Cheques weekly. Baskets, Boxes, and Labels found. Warehouse: 19, Russell Court, W.C.

**HENRY SQUELCH, North Row, Covent** Garden, FRUIT SALESMAN and COMMISSION AGENT, Importer of Bananas, and all kinds of Madeira and Canary Island Produce.

H. SQUELCH is open to RECEIVE CONSIGNMENTS of CHOICE BLACK GRAPES, MUSCATY, TOMATOS, CUCUMBERS, PEACHES, and all kinds of Hothouse Produce.

H. SQUELCH'S connection is amongst the best business houses in the United Kingdom, and he gives personal attention to all consignments. Account of Sales forwarded day of Sale. Cheques weekly, or as desired. Empties and Labels supplied. Bankers, London and County Bank. Warehouses and Banana House, James Street, Covent Garden, W.C.

**CHOICE FLOWERS—CHOICE FRUIT.**—  
Highest Market Prices guaranteed. Prompt cash.  
HENRY RIDES, Covent Garden, W.C.

**J. W. BARNHAM** receives on Commission, J. GRAPES, TOMATOS, and other Choice FRUITS; also FLOWERS. His personal attention securing highest Market Prices. Account Sales daily, and cheques at option. Baskets and labels found.  
Long Market, Covent Garden, W.C.

**WANTED, 200 Mrs. Pollock GERANIUMS,** good strong stuff, out of pots. Lowest cash price to—  
GEO. ASHENDEN AND SONS, The Nurseries, Wrotham Road, Gravesend.  
P.S.—Also wanted, any other varieties of Golden Tricolor Geraniums, for cash.

**WANTED, Cuttings in quantity, and Old** Plants of Regal Fancy Show PELARGONIUMS, and the following in stores.—Miss Jolliffe and other CARNATIONS, BOUARDIAS, GREENHOUSE and STOVE PLANTS, &c.; also some Large and Small Fancy Tricolor GERANIUMS. Lowest cash price per 100 to—  
R. C., Gardeners' Chronicle Office, 41, Wellington Street, Strand, W.C.

**WANTED, AT ONCE, Suckers of PINE-** APPLES. State varieties and price per 100.  
E. WILSON SERPELL, 21, Cornwall Street, Plymouth.

**WANTED, GOOSEBERRIES, Lancashire** Lad and Whitesmith. State age and price per 1000, for October delivery.  
WILL TAYLER, Osborn Nursery, Hampton, Middlesex.

**FREESIA REFRACTA ALBA.**—Now ready, an extra fine stock of the true pure white species, suitable for earliest forcing. Bulbs very large.—For price per 1000, apply to HURST AND SON, 152, Houndsditch, London, E.

**PHEASANT-EYE NARCISS.**—  
8,000 to 10,000 good flowering Bulbs, true, would be sold cheap for cash; are now ready. Apply,  
N. LAWRENCE AND SON, Chatteris, Cambs.

**SUPERB ORCHIDS, CHEAP.**—Thousands to select from. Write for List, free.—P. MCARTHUR, The London Nursery, 4, Maida Vale, London, W.

**G. B. FISCHER** has to offer short strong Seedling LATANIA BORBONICA and SEAFORTHIA ELEGANS, from stores, 6s. per 100, 55s. per 1000. Also a great stock of useful PALMS of all sizes.  
The Nursery, High Street, Clapham, London, S.W.

**ROSES.**—Laing's Collection cannot be surpassed. Inspection invited to see the many thousands of healthy Plants in flower. Descriptive CATALOGUE post-free.  
JOHN LAING AND SONS (Rose, Fruit Tree, and Vine Growers), Forest Hill, S.E.

**Autumn Seeds.—To the Trade.**  
**CHARLES SHARPE and CO.'S Special** Priced CATALOGUE of Seeds for Autumn Sowing is now ready, and will be sent, post-free, on application. A copy has been posted to all Customers.  
Seed Warehouse, Sleaford.—July, 1890.

**50,000 GREEN EUONYMUS,** all good shape, 8 inches to 3 feet high. 15s. to £10 per 100, free on rail.  
J. J. CLARK, Goldstone Farm, Brighton.

**FLORAL ALBUM OF CONFERENCE** DAFFODILS.—This unique "Work of Art," illustrated by GERTRUDE HARTLAND, has now become a regular Drawing-room Book, containing as it does, over 50 faithful pictures of one of the most accommodating of all spring flowers. First Edition limited to One Thousand Copies. Post-free, 2s. 6d. Complimentary to past and future purchasers. Trade Circular of Best Market Varieties gratis. Bulbs very fine, and prices moderate.—WM. BAYLOR HARTLAND, Seedsman, Cork.

**PHEASANT-EYE NARCISS, good bulbs.**  
A quantity for Sale, 2s. per bushel, if at once.  
E. POOLE, Osterley Gardens, Isleworth, Middlesex.

**FOR SALE, Four Specimen CAPELLIAS,** White and Red, 8 feet high, in tubs; also Two Large MYRTLE PLANTS, 6 feet through, all in fine condition, and only sold in consequence of the owner removing to a house where there is no accommodation for them. Price £7 10s. the lot.  
Apply, GARDENER, West Lodge, Bexley Heath, Kent.

**The Best Present for a Gardener.**  
**VINES and VINE CULTURE.**  
The most complete and exhaustive Treatise on Grapes and their Culture ever published.  
New Edition.  
Price 5s., post-free 5s. 6d.  
A. F. BARRON, Royal Horticultural Society, Chiswick.

**LAXTON'S STRAWBERRIES.**—  
New Priced LIST, with particulars of varieties for the present season, now ready.  
THOMAS LAXTON, Seed Grower, Bedford.

**LOVEL'S Yorkshire STRAWBERRIES.**—  
Strong, healthy, and well-rooted Runners, to fruit next season. Thury, Paxton, President, Noble, and other good varieties. Full Descriptive Price LIST with Testimonials free. Sample Parcel, 3d.—W. LOVEL AND SON, Driffield.

**None like the Kent Strawberries.**  
**VERY FINE PLANTS.**  
True to name—to fruit next year.  
GEO. BUNYARD AND CO., Maidstone.  
New Illustrated CATALOGUE free. (Explicit Cultural Directions and Descriptions.)

**THOMSON'S IMPROVED VINE and PLANT** MANURE.—This valuable Manure is made only by us. Every bag and tin has our name on it. To be had of all Nursery and Seedsmen, and direct from us. 1 cwt. and over carriage paid. London Agent—Mr. GEORGE, 10, Victoria Road, Putney.  
WM. THOMSON AND SONS, Clovenfords, Galashiels, N.B.

Netherby has been by the modern arts of forestry and arboriculture. Several great planters have resided here, from the Dr. Graham who planted the oldest woods to the late baronet.

#### THE WOODS.

But the greatest planter and improver was the famous statesman, Sir James Graham. Since his time Netherby, in the annals of Cumberland, has held the same place that Holkham does in Norfolk. The story would be too long to tell. It commenced before Sir James succeeded to the title and estates, when he resided at Crofthead, where Mr. Sutherland, the present wood manager, pointed with just pride to a noble, spreading Turkey Oak, planted seventy years ago, at the birth of Sir Frederick Graham. It must suffice to say of the improvements of Sir James Graham, that when he came to the estate, it was let chiefly—save the limited woodlands—to a race of crofters, who were wretched farmers, lazy by day and only active at night when they snared game, netted salmon, and smuggled goods over the border. This state of things Sir James reformed by wise measures, such as Sir John Sinclair adopted at Caithness when he reformed his estate under very similar conditions, enlarging the holdings, and introducing scientific farming, to the great advantage of all concerned. Farming is not a subject adapted to these columns, but I may say of the forestry at Netherby that I have seen nothing superior to it anywhere. On the occasion of my former visit the late Mr. Baty, who died in office here as wood manager, showed by statistics that the planting of woods on the moors and other lands had produced a considerable revenue, while the profit on the expenditure had been very satisfactory. There are now about 3500 acres of plantations, and 20 acres are planted annually over and above the quantity which is every year cleared and disposed of. Timber pays better than corn, or even grass. The sorts of trees are Larch, Scotch Fir, Spruce, and Silver Fir on the moors and stony land, and in stiffer soil, Oak and Ash. The Beech grows well on the hard, rocky soil which abounds here, and that tree forms a great ornament in some parts of the park and home domain. There is a magnificent specimen—a noble, wide-spreading Beech—on the lawn, on the north-east front of the house; and in the surrounding grounds Mr. Davidson, the gardener, presented me to a giant such as one willingly pays respect to—a grand Silver Fir. We hear of trees having been worshipped, and of deities moving in their branches in India, when all the neighbourhood came out to witness the miracle of the tree bending its top. I am sure no Fig tree in India can be more worthy of a deity than this giant Silver Fir. It has never known a pruning-hook, nor the destructive shade of other trees, and it is, therefore well feathered with side branches. The girth at 5 feet is about 14 feet, and the height not less probably than 30 yards. The Silver Fir cannot endure water at the root, and it likes uneven and even precipitous surfaces where moisture abounds, and drainage is well secured as at Inverary, where it grows pre-eminently well in the policies of the Duke of Argyll, each tree a tower, and thousands of them on the steep banks and hill sides near the castle, with ten or twelve loads of timber in each. Hundreds of acres of woods with green drives through them, surround the charming sylvan spot, where the Grahams of Netherby have reared their roof tree, and the glimpses Mr. Sutherland gave me during our drive, recalled the "pleasure in the pathless woods," which Byron describes, a pleasure which to my mind is much enhanced after a shower, where they are well kept and not pathless, and when occasional hares and many pheasants enliven the scene, and blackbirds and thrushes sing, and rabbits hop quickly across the drives to hide their upturned "scutches" in the brushwood. We did not meet with a squirrel, and no doubt these dainty little graceful creatures with their ample tails, and their impudence, beyond that of any other quadruped, prefer a sunny rather than a showery day for making their excursion; or,

perhaps, the gamekeepers have done with them what the Spanish patriot said on his death bed he had done with his enemies when he was told to forgive them before dying: "Haven't got any," he replied, "shot them all!" I have spent many a delightful day with gamekeepers in the woods, and have shot more than one of them in the gaiters, therefore I respect them. But why will they be so unnecessarily bloodthirsty? Why do they stick up traps for owls in all directions in the woods at Netherby? Owls fly by night when the young pheasants are safe in their coops. As night birds, they destroy thousands of mice and other vermin, and do a vast amount of good.

#### THE PLEASURE GROUNDS.

The 30 or 40 acres of kept grounds and shrubberies around the house are remarkable for their native beauty without any great display of exotic shrubs. They are well managed, and the Rhododendrons, which abound here, are kept well pegged down, so as to cover the ground. The wild Hyacinth is a feature of the place, many acres of it blossoming gloriously in the season. There are miles of delightful walks, sometimes by the steep sides of a burn which has cut its way deep through the sandstone-rock which forms the substratum of the several soils—from clay to stone—on the surface. A remarkably fine Ash, with tall trunk containing much timber, denotes a good soil, and perhaps clay, on that spot, whilst the numerous Beeches bespeak stony land. In the deep woods the Lichen covering the trunks and branches of the trees, tells of a moist atmosphere, and a climate favourable to timber.

Following the burn, past a summer-house on the banks, thatched with moss, and over a rustic wooden bridge high above the stream, we reached the spot where it flows by a waterfall into the Esk, turbid and tumbling wildly after rain, and smooth and bright as crystal in fine weather. Three birds follow the windings of streams in their flight, and do not cut off corners unless obliged—the kingfisher, the most wide-spread of the three; the dipper, which frequents the northern burns; and another bird of a smudged pale colour which soap and water would not whiten. I was not sure about this bird, but a young man known here for his knowledge of birds and skill in stuffing them—the naturalist of the estate—was feeding the pheasants in the wet grass of a wood pasture. He spoke with very proper caution, especially so near the Scottish border, and said that judging from my description, without having seen it, it would be the lesser whitethroat, which frequent the burns in Cumberland. I saw one in the park at Naworth, near the castle. Following the Esk by a path high above the river, we shortly crossed its stream by a narrow suspension-bridge that sagged under us as we went over, and having looked into the church of the parish of Kirk Andrews, we returned the nearest way to the Crofthead. The parish just named is 25 miles long, and the people can hardly all attend the little church; they come mostly to be buried, however, and, living or dead, the bridge shortens the distance, and was erected for that purpose. Sir James Graham rests with his ancestors in Arthur's Church, beautifully placed on a point of land close to Longtown, the name of the church and parish being a corruption apparently of Arthur's Head.

#### THE GARDENS.

The kitchen gardens reward inspection. I looked with interest on two old Myrtles planted seventy years ago, on what is now the back wall of the conservatory. There are three graperies, big houses, one 50 feet long, with rafters of 27 feet, filled with Black Hamburgs to be ripe September 1, when the demand for shooting parties, which are very popular here, is always very great. Three Peach-houses will presently yield abundance of 8 and 9-ounce fruit, and one such Peach per foot is a satisfactory crop.

The pinetum was planted by Sir Frederick Graham thirty years ago, in ground formerly a kitchen garden. It is rather a wet site, with clay sub-soil, thoroughly drained 3½ feet deep; but none of the drains low

run, as the soil is kept dry by the trees. At the planting of the pinetum, which is somewhat obscured by surrounding timber, the best specimens were obtained, and most of them are growing well. They form a good but rather crowded collection, and one could wish that objects of so much beauty were rather more widely scattered, on the Dropmore plan, and that space were afforded to admire them singly and separately. The Wellingtonia grows well here, and there are several good specimens. The stately *Abies Nordmanniana*, one of the handsomest of Conifers, thrives exceedingly well. Coming from the mountains of the Crimea, it is inured to frost, and in this sheltered site on our western coast it is, of course, untouched by the severest winter. This tree appears to thrive in a great variety of soils. One may see it growing without loss of shape or foliage in dry sandy land, whilst here it flourishes on a wet soil, perfect in shape from top to bottom, and covered with rank rich foliage. *Abies Albertiana*, from the Pacific coast, is a fit companion for the last, being as hardy, and, I thought, as handsome, for it looked its best at Netherby—lovely in its early summer foliage, sprinkled all over with light green young shoots. *A. grandis* is here in all its grace and glory, 70 feet high, or already almost half the height that it attains in Vancouver's Island, or in the Fraser River. *A. nobilis*, too, has reached, perhaps, a fourth of the height of 200 or 300 feet that Mr. Douglas assigns to it in the same regions. That other giant of the forests of the West discovered by the same explorer, and named after him, is emulating the specimens at Scone. It is a good characteristic of the Douglas Fir, noticeable in one of the specimens here, that when it loses its top by accident it soon makes another, which is not the case with all the Conifers. The Silver Firs in this collection have evidently found a favourable site. *Abies Lowiana* is another of the tribe, making itself quite at home. H. E.

#### NEW OR NOTEWORTHY PLANTS.

##### CYPRIPEDIUM HOOKERÆ (*Rchb. f.*) VAN. VOLONTEANUM, *n. var.*

This attractive *Cypripedium* is a recent Bornean introduction, known in gardens as *C. Volonteatum*, though I doubt if botanically it is more than a distinct variety of *C. Hookeræ*. The leaves are proportionally narrower than in the typical form, the petals broader and more obtuse, the lip a little constricted below the horizontal mouth, and the staminode quite orbicular, without notches. In other respects, it is quite like typical *C. Hookeræ*. The petals are 1 inch broad, bright purple at the apex, and much spotted with the same colour below; the lip 10 lines in diameter. The above differences, though slight, may perhaps serve to distinguish it from a horticultural point of view. It has appeared both with Messrs. Hugh Low & Co., of Clapton, and with Messrs. F. Sander & Co., of St. Albans. The above description was drawn from a plant flowered by the former, who have presented to Kew a wild dried flower. The latter exhibited a plant at the recent Temple show, when it received an Award of Merit.

##### ÆRIDES J'ANSONI, *hyb. nat. (?)*

The species of *Ærides* are notoriously difficult to define satisfactorily, and the subject of this note is more than usually perplexing. It appeared in a collection of *A. odoratum*, Lour., imported from Burnham by Messrs. Hugh Low & Co., through Mr. Boxall, but is quite unlike any form of that species which I am able to discover; in fact, it appears to be quite intermediate between it and *A. expansum*, *Rchb. f.*, which also grows there, for which reason I think it may be a natural hybrid between the two. Compared with *A. odoratum*, the leaves are narrower, and less fleshy, the tips of the segments more rosy-purple, the side-lobes of the lip more spreading, a little more curved, and transversely barred with rosy-purple, and the front lobe twice as broad,
