Valuable Prizes will be given, including Cups, Gold Medals, and Money Prizes, amounting to nearly FOUR HUNDRED POUNDS, open to all England. Entries Close July 29. Schedules may be had by applying to

JOHN GLOVER, Secretary.  
Wood Lane, Gateacre, near Liverpool.  
1st Lancashire Volunteers and H.M.S. "Indefatigable" Bands will be in attendance each day.

**DEVIZES HORTICULTURAL SOCIETY** will hold its ANNUAL SHOW, in Roundway Park, by kind permission of C. E. H. A. Colston, Esq., on AUGUST 7. LARGE PRIZES for STOVE and GREENHOUSE PLANTS, SILVER CUP and other MONEY PRIZES for ROSES. Schedule on application to  
Mr. C. N. MAY, or J. A. RANDELL, Hon. Secs.

## CARTERS' CASH PRIZES,

to be Competed for at the Show of the ROYAL HORTICULTURAL SOCIETY, August 3. For the best Six Pots of TOMATOS, selected from the following varieties—Carter's Green Gage, Carter's Holborn Ruby, Carter's Golden Drop, Carter's Dedham Favourite, Carter's Grapeshot, Carter's Red Currant, President Garfield, Vick's Criterion. 1st Prize, £3 3s.; 2d, £2 2s.; 3d, £1 1s.; 4th, 10s. 6d. IMPORTANT REGULATION.—All exhibits to be staged in 24-sized pots (8 inches in diameter, inside rim), and the special label attached that has been distributed with each packet of seed. All exhibits without it will be disqualified. (Open to Gentlemen's Gardeners and Amateurs only.)

**CARTERS, THE QUEEN'S SEEDSMEN,**  
By Royal Command to the Prince of Wales,  
237 and 238, HIGH HOLBORN, LONDON, W.C.

**Hyacinths, Tulips, &c.**  
**BUDDENBORG BROTHERS, BULB GROWERS,** House Bloemswaard, Hillegom, near Haarlem, Holland. Wholesale CATALOGUE now ready, and will be sent, post-free, on application.

**TWO HUNDRED THOUSAND HERBACEOUS and ALPINE PLANTS** for Borders, Rock-work, &c. See Descriptive LIST, giving colour, height, time of flowering, &c., free by post for 1d. stamp. Selection of 100 good showy varieties for 25s.  
R. SMITH AND CO., Nurserymen and Seed Merchants, Worcester.

**Christmas Roses.**  
**BUDDENBORG BROTHERS, BULB GROWERS,** Hillegom, near Haarlem, Holland, are now booking orders for the above. Prices will be given on application.

**To the Trade Only.**  
**TEA ROSES,** on own roots, extra strong, out of 4 1/2-inch pots, £2 per 100, for cash.  
MAIRIS AND CO., Weston-in-Gordano, Bristol.

**BULL'S CHOICE PRIMULAS (alba and rosea),** Herbaceous CALCEOLARIAS and choicest CINERARIAS.—150,000 of the above at 1s. 4d. per dozen; 7s. per 100; 60s. per 1000, all good, strong, and healthy. Terms cash with all orders.  
T. FLETCHER AND SON, Florists, &c., Chesterfield.

**Bulbs from Holland and Plants from Ghent.**  
**WATSON AND SCULL, HORTICULTURAL AGENTS,** 90, Lower Thames Street, London, E.C. trust that their Friends, as heretofore, when ordering this season will direct them to be sent to their care, thus securing speed and the usual low charges.

**LAPAGERIA ALBA,** well-rooted plants, 10s. 6d., 15s. and 21s. A few extra specimens, size and price on application.  
**LAPAGERIA RUBRA,** superb, 7s. 6d., 10s. 6d. and 15s. A few extra-sized specimens, size and prices on application.  
W. HOWARD, Southgate, N.

**LILY OF THE VALLEY.**—Best quality for forcing, single crowns. Apply to SEEMANN and GOEPEL, Wandsbeck, near Hamburg.

**SPECIAL OFFER OF FERNS.**—Having a splendid stock, we offer 100 Stove and Greenhouse FERNS and SELAGINELLAS, in 50 species and varieties, nice healthy plants, for 42s. Special Trade LIST now ready. W. AND J. BIRKHEAD, Fern Nursery, Sale, Manchester.

**Best Time to Sow Now, for Early Flowering in Spring.**  
**PANSIES.**—Assortment of 18 splendid varieties, containing each one packet, 3s. 6d.; assortment of 12 fine varieties, containing each one packet, 1s. 3d.; splendid mixed, per pound 36s., per ounce 3s. Carefully saved only from exhibition flowers, 1000 seeds 2s. 6d., per packet 6d. My collection of Pansies gained the 1st Prize at the Exhibition at Magdeburg. Price LIST forwarded gratis and post-free on application. FRED. ROEMER, Seed Grower, Quedinburg, Germany.

**Strawberry Plants.**—In consequence of **H. CANNELL AND SONS** being located in the midst of hundreds of acres of the above (runners are this year unusually fine and early), they would be pleased to quote price for any quantity and any sorts.  
Swanley, Kent.

**EARLY CABBAGE SEED.**—The best and earliest sort is MVATT'S EARLY OFFENHAM.—For price, apply to F. AND C. MVATT, Offenham, Evesham.

**WANTED, CUTTINGS of Tricolor PELARGONIUMS; M. Baltet, Wonderful, D. of Eindhoven.** Cash price per 1000.  
A. E., Mr. Durraot, Fruiterer, Great Yarmouth.

**Euphorbia jacquiniiflora.**  
**WANTED TO PURCHASE.** Send sample and lowest price to ROBERTS BROS. AND ARNOLD, East Grinstead.

**Notice to Senders.**  
**WANTED, Queen PINES, fine PEACHES, MELONS, TOMATOS.** Also, STEPHANOTIS, EUCHARIS, GARDENIAS, and good ROSES in quantity. WISE AND RIDES, Fruit and Flower Salesmen, Covent Garden, London, W.C.

For Present Sowing.  
**SUTTONS' CABBAGE SEED.** Post-free.

**SUTTONS' ONION SEED.** Post-free.

**SUTTONS' LETTUCE SEED.** Post-free.

**SUTTONS' CAULIFLOWER SEED.** Post-free.

**SUTTONS' RADISH SEED.** Post-free.

**SUTTONS' FLOWER SEEDS.** Post-free.

For full Particulars, see  
**SUTTONS' AUTUMN LIST OF SEEDS.** Post-free on application.

**SUTTON AND SONS,** THE QUEEN'S SEEDSMEN, And by Special Warrant to the Prince of Wales, READING, BERKS.  
Azaleas, Camellias, Palms, Roses, &c.  
**C. VUYLSTEKE, NURSERYMAN,** Loochristi, near Ghent, Belgium. Wholesale CATALOGUE may be had free of Messrs. R. SILBERRAD AND SON, 25, Savage Gardens, London, E.C.  
N.B. Plants grown specially for English Trade.

**To the Trade only.**  
**E. H. KRELAGE AND SON, NURSERYMEN, SEEDSMEN, and FLORISTS,** Haarlem, Holland. The Wholesale CATALOGUE (No. 358A) of Dutch Flower Roots and Miscellaneous Bulbous and Tuberous-rooted Plants for 1882-83 is now ready, and may be had free on prepaid application, by Nurserymen, Florists and Seedsmen.

**Valuable Imported Orchids.**—Special List, No. 59.  
**THE NEW PLANT and BULB COMPANY** beg to inform their Friends that the above NEW LIST is just published, and will be sent post-free on application. Lion Walk, Colchester.

**CREEPERS for WALLS, TRELLISES, &c.,** in great variety. See Descriptive LIST. Most of these plants being in pots, may be moved now.  
RICHARD SMITH AND CO., Nurserymen and Seed Merchants, Worcester.

**Hyacinths, Tulips, Crocus, Lilies, &c.**  
**C. G. VAN TUBERGEN, JUN.,** Haarlem, Holland.—Wholesale CATALOGUE now ready, and may be had free on application to Messrs. R. SILBERRAD AND SON, 25, Savage Gardens, Crutched Friars, London, E.C.

**Tea Roses.**  
**THE LIVERPOOL HORTICULTURAL COMPANY (JOHN COWAN), Limited,** The Vineyard and Nurseries, Garston, near Liverpool, have a splendid stock of TEA ROSES in all the leading varieties. LIST free. Price to the Trade on application. Also a large stock of GRAPE VINES.

**Christmas Roses.**  
**ANTONY RIEMSCHEIDER,** Brandenburg-on-Havel, Germany, begs to offer HELLEBORUS NIGER, extra strong clumps at 100s. per 1000. All orders should be addressed to Messrs. R. SILBERRAD AND SON, 25, Savage Gardens, London, E.C.

**EIGHTY THOUSAND CLEMATIS,** in Pots, of all the finest double and single varieties (some of the flowers of which become 10 inches across, and are of every shade, from pure white to the darkest purple), for climbing and bedding, from 12s. to 24s. per dozen, strong plants. Descriptive LIST on application.  
RICHARD SMITH AND CO., Nurserymen and Seed Merchants, Worcester.

**East Lothian Intermediate Stocks.**  
**THOMAS METHVEN AND SONS** beg to offer their choice strain of the above, in three colours, viz., Scarlet, Purple and White, at 15s., 2s. 6d. and 5s. each colour. 15, Princes Street, Edinburgh.

**6000 Grape Vines.**  
**THE LIVERPOOL HORTICULTURAL COMPANY (JOHN COWAN), Limited,** The Vineyard and Nurseries, Garston, near Liverpool, have a splendid stock of VINES, grown from eyes this year, suitable for present planting. CATALOGUE free. The Trade supplied. Also a large stock of TEA ROSES.

**STRAWBERRY RUNNERS.**—Strong, healthy, and well-rooted, from all the best market varieties. Sample and Price LIST post-free. Manual on Strawberry Culture, 6d.  
W. LOVEL AND SON, Strawberry Growers, Driffield.

**CAULIFLOWER, BRUSSELS SPROUT PLANTS.**  
VEITCH'S AUTUMN GIANT, 3s. 6d. per 1000.  
BRUSSELS SPROUTS, 3s. per 1000.  
Packages 3d. per 1000 extra. Order of R. BATH, Crayford; or J. BATH, 34, Wellington Street, Covent Garden W.C.

truth of the story till presently, at a spot half-way between the house and the lodge, and half a mile from each, the trees grew larger, and in a little dell, or hollow, carpeted with Ferns and mosses, I observed some Oaks of considerable size. A Beech and a Spruce came first in my way, and they measured 5 or 6 feet in girth; then came a Silver Fir, measuring 9 feet; and then some Oaks varying from 6 feet to 10 feet. They were the largest trees I had seen. "These will do," I thought; "I wonder if the remains hang in the tree still!"

A hollow trunk stood among the other Oaks in this secluded dell, with a cavity charred by fire, and a diameter of 4 feet. It would have held Howell Sele, however stout he may have been. My search ended here; this was not the identical tree, but the real Oak is stated to be within a stone's-throw. The story is that Glendower boarded up the body, which was not discovered till many years had elapsed.

The foregoing is an example of a comparatively modern Oak, rendered interesting, as the reader, it is hoped, may think, by the nature of its site, and the romantic story connected with it. Among the ancient Oaks of England few are more interesting than the gigantic ruin now standing in an arable field on the banks of the Severn, near Shrewsbury. It is the sole remaining tree of those vast forests which gave Shrewsbury its Saxon name of Schobbesburgh. The Saxons seized this part of the county A.D. 577, when they burnt the Roman city of Uriconium, where Wroxeter now stands, 4 miles from the village of Cressage; and underneath this now decrepit dotard it is said that the earliest Christian missionaries of those times—and possibly St. Chad himself—preached to the heathen before churches had been built. The Cressage Oak—called by the Saxons Crite-ache, Christ's Oak—is probably not less than fourteen centuries old. The circumference of the trunk was about 30 feet, measured fairly at a height of 5 feet from the ground; but only about one-half of the shell of the hollow trunk now remains. It still bears fifteen living branches, each 15 feet or 16 feet in length. A young Oak grows from the centre of the hollow.

The noted Oaks of England, thanks to those who have preserved them, thanks to the universal veneration for timber, and to a stirring and lengthened history, are innumerable. Windsor Forest is particularly rich in historic Oaks, and Sherwood Forest, though disafforested, still contains some memorial timber, like Needwood, once a Crown forest, now a fine estate of well-farmed land. Dryden's

"Three centuries he grows and three he stays,  
Supreme in state, and in three more decays,"

is a poetical statement, and some of the dates on trees cut down in Sherwood Forest, and marked 600 years before, in the time of King John, prove that it is an under-estimate. The great Winfarthing Oak in Norfolk was called the "Old Oak" in the time of the Conqueror, and has been supposed to have attained the age of 1500 years. The King Oak in Windsor Forest is upwards of 1000 years old. *A Traveller.*

**FRAGARIA INDICA.**—This is extensively grown in the Royal Nurseries, Harborne Road, Edgbaston, Birmingham, and a useful plant it is for decorative purposes. In one of the houses it is hanging down the side walls from 4 to 6 feet long, literally covered with its scarlet fruit. *Dipladenia boliviensis* is also well grown on the roof of one of the stoves; this covers a space 18 feet by 6 feet, covered with its beautiful pure white flowers with yellow throat. It is a useful plant, and can be had in flower nearly all the season. *Gladiolus The Bride* (syn. *Covillei alba*) is wonderfully well grown in 5 and 6-inch pots, as also is the American Tuberoses *The Pearl*, which is valuable for cutting purposes. These are well done by Mr. Spinks, the manager, a good all-round cultivator.

## New Garden Plants.

**STENOMESSON STRICKLANDI, n. sp.\***

THIS is a very distinct new Amaryllid, from the Andes of Ecuador, raised and recognised as a novelty by Sir C. W. Strickland, Bart., of Hildenley, and Boynton, in Yorkshire, to whom I am indebted for a couple of flowering specimens, and a drawing of the fruit in an immature stage. In inflorescence and the size and colouring of the flowers it is most like *Stenomesson suspensum* or *coccineum*, of which there are good recent figures in Saunders' *Refugium* (tabs. 22 and 309), but the perianth-segments are as long in proportion to the tube as in *Callipsyche*, and Sir C. Strickland tells me that the leaves closely resemble those of *Callipsyche aurantiaca*, whilst in all the *Stenomessons* and *Coburgias* they are linear, without any petiole. And it differs also from the *Stenomessons* in requiring more heat for its successful culture.

Leaves petioled, oblong-lanceolate, resembling those of *Callipsyche aurantiaca*. Scape 1 foot long, terete, slender. Umbel 5—6 flowered, with a spathe of several linear bracts; pedicels cernuous, about 1 inch long. Ovary oblong-trigonal,  $\frac{1}{2}$  inch long in the flowering stage. Perianth infundibuliform,  $1\frac{1}{4}$  inch long; tube green campanulate  $\frac{1}{2}$  inch long; segments permanently connivent oblanceolate cuspidate bright red 1 inch long. Stamens inserted at the throat of the perianth-tube,  $\frac{1}{2}$  inch larger than the segments; filaments united in the lower half; free portion of the filaments dilated and valvate towards the base, without any interstaminal teeth; anthers small oblong versatile pale yellow; style finally protruded beyond the stamens; stigma capitate. Capsule short deeply three-lobed. *J. G. Baker.*

**SAXIFRAGA MILESII, Hort. Leichtlin.†**

This is one of the Himalayan Saxifrages of the *Megasea* group, which has lately attracted the attention of cultivators both in England and on the Continent, and for which no special name, so far as I am aware, has yet been published. We have had a fine plant of it at Kew at the east end of the rockery in the herbaceous ground this summer. We regarded it as a variety of *Saxifraga Stracheyi*, but it differs from the type of that sub-species as figured *Bot. Mag.*, tab. 5967, by its longer leaves, oblong calyx segments, which are as long as the stamens, and white petals with a more distinct claw. I have just received it, with a note of its distinctive peculiarities, from Mr. Max Leichtlin, under the above name, given in honour of Mr. Frank Miles, of Chelsea, the well-known artist, who imported the seeds from an elevation of 11,000 feet from Kidarkanta, in the North-Western Himalayas. With us it flowers the latest of all the forms of the *Megasea* group, and at the present time (the last week in June) all its petals have faded. I think all the Himalayan *Megaseas* are best regarded as sub-species and varieties of one variable specific type, and that the same may be said of all the Siberian forms.

Leaves obovate, obtuse, reaching a length of 9—12, and a breadth at the middle of 4—5 inches, obtuse, more or less distinctly crenate, deltoid, not at all cordate at the base, distinctly ciliated on the margin, glabrous on both surfaces, bright green on the face, pale green on the back. Corymbs dense, about as long as the leaves. Peduncles and calyx finely glanduloso-pubescent. Calyx with a campanulate tube and oblong segments  $\frac{1}{2}$  inch long. Ovaries adnate to the calyx only at the very base. Petals white, or slightly tinged with pink, obovate with a distinct claw, 9—10 lines long. Stamens inserted

\* *Stenomesson Stricklandi, Baker, n. sp.*—Foliis hysteranthiis petiolatis oblongo-lanceolatis; scapo tereti pedali; bracteis pluribus linearibus; umbellis 5—6 floris; pedicellis cernuis; ovario oblongo-trigono; perianthii segmentis rubris oblanceolatis cuspidatis tubo viridi quadruplo longioribus; staminibus exsertis, filamentis dimidio inferiori monadelphis, dentibus interstamineis nullis; stylo exserto, stigmati capitato; fructu brevi profunde lobato.

† *Saxifraga Milesii, Hort. Leichtlin.*—Foliis obovatis obtusis crenatis basi deltoides margine ciliatis dorso et facie glabris; pedicellis calycibusque glanduloso-puberulis, calycis segmentis oblongis tubo 2—3-plo longioribus; staminibus æquilongis; petalis albidis obovatis distincte uoguculatis.

with the petals at the throat of the calyx-tube, halt as long as the petals. Styles as long as the calyx-segments. *J. G. Baker.*

**ACINETA HRUBYANA, n. sp.\***

This fine new *Acineta* is distinct from all known species in the narrow erect side partition of the lip, and in the white colour of the flowers, which have only a few purple spots inside the lip, mostly on the sella turcica. It was imported from New Granada by Mr. Sander, and has just flowered with Baron Hruby, of Hilde, in Bohemia, whose name it may bear. *H. G. Rehb. f.*

**MASDEVALLIA ARMINII (Lind.), Rehb. f.**

I called this in 1854 (Seemann's *Bonplandia*, ii., 283), "plantula elegantissima." It bore its name from my late unfortunate friend, Hermann Wagener. It is much in the way of *Masdevallia Wageriana*, yet the flower is a good deal larger and most probably distinct, expanded and of a very fine rose colour, tinged with purple. It would seem to be a rare gem, as it has not appeared since Wagener's days. It was not, however, discovered by Wagener, but by Louis Schlim, Director Linden's half-brother, which we did not know when we gave the name. It has been sent me now by Mr. F. Sander, and will prove a noble addition to the collection of *Masdevallia* gems, a nice companion for *Masdevallia Estradæ* and *ludibunda*. *H. G. Rehb. f.*

**ANGULOEA DUBIA, Rehb. f.**

Mr. B. S. Williams has kindly forwarded me a second flower, which is identical with the first one in all the most minute details; hence, the fear of its being an abnormal state is much lessened. This is a case of interest for science, as it has been shown often by Messrs. Veitch. *H. G. Rehb. f.*

**MASDEVALLIA (FISSÆ) TRICOLOR, n. sp.†**

This is near *Masdevallia Estradæ*. It has flowers equalling or surpassing those of that species. Most probably it is very curious from its colours. The dried flowers look reddish-mauve. They were said to be purple by Messrs. Roezl and Wallis, who discovered them. A memorandum of Mr. Carder calls them "light blue colour." The lip is very curious and uncommon, nearly square; the tails of the sepals are short; the lateral sepals connate. It comes from New Granada, and is in the possession of Messrs. Shuttleworth, Carder & Co. *H. G. Rehb. f.*

**ODONTOGLOSSUM ANDERSONIANUM TENUE GUTTULATUM.**

A very nice variety, near *Odontoglossum Andersonianum tenue*, but most beautifully spotted with small brown spots on the sepals and petals. Lip white with a yellow base and a few brown lines. It was kindly sent me by Messrs. H. Low & Co. *H. G. Rehb. f.*

**CYPRIPEDIUM NIGRITUM, n. sp.**

A Bornee introduction of the New Buth Company, Lion Walk, Colchester. Leaves like those of *Cypridium virens*, light green, with darker reticulations. The flower comes near to that of *Cypridium barbatum*. The colours are those of a very dark variety. The odd sepal is oblong acute, not almost circular, thus coming nearer that of *Cypridium purpuratum*. The veins stand much nearer to one another. The petals are much narrower, and the marginal warts stand partly over the middle to the apex. The equal sepals form a very narrow body. There are obscure warts on the stalk of the lip. Staminode like that of *Cypridium barbatum*, but with intermediate small teeth in front, and longer angles on each side of the dorsal sinus. Thus it is near *Cypridium barbatum*, but it appears quite distinct. *H. G. Rehb. f.*

\* *Acineta Hrubyana, n. sp.*—Racemo laxo; floribus candidis maculis purpureis intus in labello, presertim in sella turcica; sepalis tepalisque affinium specierum; labelli partitionibus lateralibus ligulatis oblique obtuseque retusiusculis, partitione mediana ligulata obtuse acute concava, sella turcica pandurata antice et postice emarginato-bidentata; dentibus acutis retusis pupula supposita ligulata emarginata retrorsum curva, carinis obliquis in partitionibus lateralibus, carina longitudinali utrinque in ungue canaliculato; columnæ basi puberæ alis rotundatis; flores pulchre albi eboracei. *H. G. Rehb. f.*

† *Masdevallia tricolor, n. sp.*—Fissæ unilobæ; bractea ampla pedicellum non æquante; sepalis impari oblongo breviter caudato; sepalis lateralibus subæqualibus, per tres quartas coactis; tepalis cuneato ligulatis angustis, labello quadrato obtusangulo; columna apiculata, apiculo nunc fissis. Nova Granada, Roezl! Wallis! Carder! *H. G. Rehb. f.*
